TECHNICAL SKILLS

Languages: Python, JavaScript, C++
Machine Learning: Random Forest, Logistic Regression, Scikit-learn, TensorFlow , Langchain
Databases: MySQL, MongoDB
Tools: Git, Github, Google Colab , Microsoft Excel , Microsoft PowerBI

PROJECTS

Airbnb Clone Web Application **Full-Stack Development**

- Developed a full-stack Airbnb-style web application replicating property listing and booking workflows.
- Implemented responsive user interfaces and structured frontend components.
- Focused on clean code organization, usability, and real-world application behavior.

Phishing Email Detection System **Machine Learning**

- Designed a phishing email classification system using Random Forest and Logistic Regression.
- Performed data preprocessing, feature extraction, and comparative model evaluation.
- Gained practical exposure to cybersecurity risks and AI-based threat mitigation.

BHAAV.AI - Emotion Analysis System **Computer Vision | DL**

- Developed a facial emotion analysis system focused on Bhaav (अनुभूति)—interpreting perceived emotional states rather than simple emotion detection.
- Implemented facial feature extraction and emotion classification for five core emotional states.
- Enhanced human–computer interaction by emphasizing intuitive emotional understanding.

Driver Drowsiness Detection System **Computer Vision | DL**

- Developed a real-time driver drowsiness detection system using facial landmark analysis.
- Implemented eye-closure and head-movement monitoring with confidence-based validation.
- Aimed at improving road safety by generating timely alerts under fatigue conditions.

Linkedin AI Auto-Publishing System **Generative AI | Automation**

- Developed an advanced AI-powered LinkedIn content generation and auto-publishing system with one-click workflow.
- Implemented automated LinkedIn API integration to publish AI-generated posts instantly after user acknowledgment.
- Designed structured content generation with hooks, insights, and optimized hashtags to enhance engagement and personal branding.
- Streamlined the entire content lifecycle — from idea generation to live publishing — reducing manual effort significantly.

VISHLESHAK.AI – CSV & Excel Financial Data Analyzer **Langchain | NLP**

- Built an intelligent financial analysis assistant capable of processing CSV and Excel datasets for automated insights.
- Implemented data preprocessing, visualization, and pattern detection to generate meaningful summaries and business recommendations.
- Enabled conversational querying over structured datasets to enhance decision-making through AI-driven analysis.

EDUCATION

Charotar University of Science and Technology (CHARUSAT) **Changa, Gujarat**

B.Tech – IT (Pre-final Year student) ***(CGPA 8.14)*** Aug 2023 -June 2027

EXPERIENCE

Web Developer Intern at CODSOFT June 2025 – July 2025

ACHIEVEMENTS

- IBM Data Analysis Professional Certificate | Coursera
- IBM Machine Learning Professional Certificate | Coursera
- DECODE-X 2026 National Level Data Analytics Hackathon finalist
